Author Index

Ai, M.
Preparation of high-surface-area titanium–vanadium binary pyrophosphate catalysts 51
Arakawa, H., see Takeuchi, K. 149
Arnoldy, P.
—, Van Oers, E.M., De Beer, V.H.J., Moulijn, J.A. and Prins, R.
Thiophene hydrodesulphurization activity of alumina-, silica- and carbon-supported sulphided Re_2O_7 catalysts 241
Atanasova, P.
—, and Halachev, T.
Influence of phosphorus concentration on the type and structure of the compounds formed in the oxide form of phosphorus–nickel–molybdenum/alumina catalysts for hydrodesulphurization 295
Ayame, A.
—, Sawada, G., Sato, H., Zhang, G., Ohta, T. and Izumizawa, T.
Characterization of chlorine-treated alumina surfaces 25

Baiker, A., see Gasser, D. 279
Baltrus, J.P.
—, Diehl, J.R., McDonald, M.A. and Zarochak, M.F.
Effects of pretreatment on the surface properties of iron Fischer–Tropsch catalysts 199
Bettahar, M.M., see Denise, B. 365
Brown, S.J.
—, Clutterbuck, L.M., Masters, A.F., Sachinidis, J.I. and Tregloan, P.A.
Kinetic and mechanistic studies of nickel-catalysed olefin oligomerization 1

Cant, N.W., see Maitra, A.M. 187
Cant, N.W., see Yong, Y.S. 37
Centi, G.
—, Golinelli, G. and Trifiro′, F.
Nature of the active sites of $(VO)_2P_2O_7$ in the selective oxidation of n-butane. Evidence from doping experiments 13
Cervera-March, S., see Giménez, J. 307
Cherifi, O., see Denise, B. 365
Clausen, B.S.
—, Topsøe, H. and Morup, S.
Preparation and properties of small silica-supported iron catalyst particles, Influence of reduction procedure 327
Clutterbuck, L.M. see Brown, S.J. 1
Cogen, J.M.
— and Maier, W.F.
Reaction selectivity as a test for catalysis on exposed metal 235
Cullinane, M.B., see Richardson, W.T. 159

Damyanova, S.
—, Spojakina, A.A. and Shopov, D.M.
Study of low-percentage alumina-supported nickel–molybdenum catalysts by ESR spectroscopy and magnetic measurements 177
De Beer, V.H.J., see Arnoldy, P. 241
De Beer, V.H.J., see Van Doorn, J. 253
Denise, B.
—, Cherifi, O., Bettahar, M.M. and Sneeden, R.P.A.
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365
Deshpande, V.M., see Narasimhan, C.S. L1
Diehl, J.R., see Baltrus, J.P. 199

Engler, B.
—, Koberstein, E. and Schubert, P.
Automotive exhaust gas catalysts: Surface structure and activity 71
Ernst, S.
—, Weitkamp, J., Martens, J.A. and Jacobs, P.A.
Synthesis and shape-selective properties of ZSM-22 137
Esquivel, N., see Fierro, J.L.G. 353
Esquivel, N., see López Cordero, R. 341

Fierro, J.L.G.
—, López Agudo, A., Esquivel, N. and López Cordero, R.
Effect of phosphorus on molybdenum-based hydrotreating catalysts. II. Hydrodesulphurization activity and characterization of the sulphided-state of P–Mo/Al_2O_3 systems 353
Fierro, J.L.G., see López Cordero, R. 341
Frank, A.S., see Richardson, W.T. 159

Fujitani, Y., see Muraki, H. 93

Gasser, D.
— and Baiker, A.
Hydrogenation of carbon dioxide over copper–zirconia catalysts prepared by in-situ activation of amorphous copper–zirconium alloy 279
Giménez, J.
— and Cervera-March, S.
Catalytic activity of sulphonated styrene–divinylbenzene resins 307
Golinelli, G., see Centi, G. 13
Golunski, S.E.
— and Jackson, D.
Antimony oxides: A guide to phase changes during catalyst preparation – a review 123

Halachev, T., see Atanasova, P. 295
Hanaoka, T., see Takeuchi, K. 149
Hattori, H., see Tanabe, K. 63
Hattori, T., see Kito, S. 107
Hong, C.-T.
—, Yeh, C.-T. and Tu, F.-H.
Effect of reduction and oxidation treatments on Pd/ZnO catalysts 385

Izumizawa, T., see Ayame, A. 25

Jackson, D., see Golunski, S.E. 123
Jacobs, P.A., see Ernst, S. 137
Janardanarao, M., see Salvapari, G.S. 223

Kito, S.
—, Hattori, T. and Murakami, Y.
Expert systems approach to computer-aided design of catalysts 107
Klinowski, J., see Maesen, T.L.M. 373

Subject Index

Acrylic Acid
Preparation of high-surface-area titanium–vanadium binary pyrophosphate catalysts 51
Adsorption
Characterization of chlorine-treated alumina surfaces 25
Ageing
Automotive exhaust gas catalysts: Surface structure and activity 71
Aldol condensation
Preparation of high-surface-area titanium–vanadium binary pyrophosphate catalysts 51
Aldol condensation
Addition of metal cations to magnesium oxide catalyst for the aldol condensation of acetone 63
Alkene oligomerization
Kinetic and mechanistic studies of nickel-catalysed olefin oligomerization 1
Alumina
Characterization of chlorine-treated alumina surfaces 25
Antimony oxides
Antimony oxides: A guide to phase changes during catalyst preparation – a review 123
Aromatization
Aromatization of isophorone to 3,5-xylenol 223
Automotive exhaust gas
Automotive exhaust gas catalysts: Surface structure and activity 71

Bioethanol-to-ethylene process
The Bioethanol-to-ethylene (B.E.T.E.) process 265
Butane oxidation
Nature of the active sites of $(VO)_2P_2O_7$ in the selective oxidation of n-butane. Evidence from doping experiments 13

Calcination
Low-temperature plasma calcination of zeolite NH_4,Na-Y 373
Carbon dioxide hydrogenation
Hydrogenation of carbon dioxide over copper–zirconia catalysts prepared by in-situ activation of amorphous copper–zirconium alloy 279
Carbon dioxide hydrogenation
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365
Carbon filaments
Novel type of carbon-supported catalysts. I. Preparation and characterization 253
Carbon monoxide dissociation
Novel type of carbon-supported catalysts. I. Preparation and characterization 253
Catalyst characterization (AAS, electron microprobe analysis)
Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Catalyst characterization (constraint index)
Synthesis and shape-selective properties of ZSM-22 137
Catalyst characterization (DRS, temperature-programmed techniques)
Effect of phosphorus on molybdenum-based hydrotreating catalysts. I. Characterization of the oxidic state of P–Mo/Al_2O_3 systems 341
Catalyst characterization (TEM, temperature-programmed techniques)
Novel type of carbon-supported catalysts. I. Preparation and characterization 253
Catalyst characterization (ESR, magnetic measurements)
Characterization and deactivation of NiO–ThO_2 catalysts 159
Catalyst characterization (ESR, magnetic measurements)
Study of low-percentage alumina-supported nickel–molybdenum catalysts by ESR spectroscopy and magnetic measurements 177
Catalyst characterization (IR)
Characterization of chlorine-treated alumina surfaces 25
Catalyst characterization (IR, DRS)
Influence of phosphorus concentration on the type and structure of the compounds formed in the oxide form of phosphorus–nickel–molybdenum/alumina catalysts for hydrodesulphurization 295

Catalyst characterization (IR, XPS)
Effect of phosphorus on molybdenum-based hydrotreating catalysts. II. Hydrodesulphurization activity and characterization of the sulphided state of P-Mo/Al_2O_3 systems 353
Catalyst characterization (MAS NMR, IR)
Low-temperature plasma calcination of zeolite NH_4, Na-Y 373
Catalyst characterization (MASS-NMR)
The Bioethanol-to-ethylene (B.E.T.E.) process 265
Catalyst characterization (Mössbauer spectroscopy)
Preparation and properties of small silica-supported iron catalyst particles. Influence of reduction procedure 327
Catalyst characterization (performance tests)
Automotive exhaust gas catalysts: Surface structure and activity 71
Catalyst characterization (XPS, XRD)
Synthesis of C_2-oxygenates from syngas over cobalt catalysts promoted by ruthenium and alkaline earths 149
Catalyst characterization (XPS, Auger spectroscopy, ion scattering spectrometry)
Effects of pretreatment on the surface properties of iron Fischer-Tropsch catalysts 199
Catalyst characterization (XRD, SEM, Auger electron spectroscopy)
Hydrogenation of carbon dioxide over copper-zirconia catalysts prepared by in-situ activation of amorphous copper-zirconium alloy 279
Catalyst characterization (XRD, TEM, temperature-programmed techniques)
Effect of reduction and oxidation treatments on Pd/ZnO catalysts 385
Catalyst preparation (autoclaving)
Synthesis and shape-selective properties of ZSM-22 137
Catalyst preparation (CAD)
Expert systems approach to computer-aided design of catalysts 107
Catalyst preparation (dry mixing)
Synthesis of C_2-oxygenates from syngas over cobalt catalysts promoted by ruthenium and alkaline earths 149
Catalyst preparation (high temperature chlorination)
Characterization of chlorine-treated alumina surfaces 25
Catalyst preparation (incipient wetness)
Novel type of carbon-supported catalysts. I. Preparation and characterization 253
Catalyst preparation (melt spinning)
Hydrogenation of carbon dioxide over copper-zirconia catalysts prepared by in-situ activation of amorphous copper-zirconium alloy 279
Catalyst preparation (plasma calcination)
Low-temperature plasma calcination of zeolite NH_4,Na-Y 373
Catalyst preparation (precipitation)
Preparation of high-surface-area titanium-vanadium binary pyrophosphate catalysts 51
Catalyst preparation (wet impregnation)
Addition of metal cations to magnesium oxide catalyst for the aldol condensation of acetone 63
Catalyst preparation (wet impregnation)
Study of low-percentage alumina-supported nickel-molybdenum catalysts by ESR spectroscopy and magnetic measurements 177
Catalyst preparation (wet impregnation)
Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Catalyst preparation (wet impregnation)
Preparation and properties of small silica-supported iron catalyst particles. Influence of reduction procedure 327
Chlorine-treated alumina
Characterization of chlorine-treated alumina surfaces 25
Cobalt-alkaline earths
Synthesis of C_2-oxygenates from syngas over cobalt catalysts promoted by ruthenium and alkaline earths 149
Cobalt-molybdenum/alumina-carbon
Novel type of carbon-supported catalysts. I. Preparation and characterization 253
Cobalt-ruthenium
Synthesis of C_2-oxygenates from syngas over cobalt catalysts promoted by ruthenium and alkaline earths 149
Coke formation
Novel type of carbon-supported catalysts. I. Preparation and characterization 253
Computer-aided design

Expert systems approach to computer-aided design of catalysts 107
Copper–zirconia
Hydrogenation of carbon dioxide over copper–zirconia catalysts prepared by in-situ activation of amorphous copper–zirconium alloy 279
Copper/zirconia
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365
Copper/alumina
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365
Copper/magnesia
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365

Doping
Nature of the active sites of $(VO)_2P_2O_7$ in the selective oxidation of n-butane. Evidence from doping experiments 13

Ethene oxidation
Comparative study of nitrous oxide and oxygen as oxidants for the conversion of ethylene to ethylene oxide over silver 37
Ethylbenzene dehydrogenation
Expert systems approach to computer-aided design of catalysts 107
Expert systems
Expert systems approach to computer-aided design of catalysts 107

Fischer–Tropsch synthesis
Effects of pretreatment on the surface properties of iron Fischer–Tropsch catalysts 199

Heteropolyanion complexes
Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Hexene hydrogenation
Effect of phosphorus on molybdenum-based hydrotreating catalysts. I. Characterization of the oxidic state of P–Mo/Al_2O_3 systems 341
Hydrodenitrogenation
Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Hydrodesulphurization
Characterization and deactivation of NiO–ThO_2 catalysts 159
Hydrodesulphurization
Study of low-percentage alumina-supported nickel–molybdenum catalysts by ESR spectroscopy and magnetic measurements 177
Hydrodesulphurization
Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Hydrodesulphurization
Thiophene hydrodesulphurization activity of alumina-, silica- and carbon-supported sulphided Re_2O_7 catalysts 241
Hydrodesulphurization
Influence of phosphorus concentration on the type and structure of the compounds formed in the oxide form of phosphorus–nickel–molybdenum/alumina catalysts for hydrodesulphurization 295
Hydrodesulphurization
Effect of phosphorus on molybdenum-based hydrotreating catalysts. II. Hydrodesulphurization activity and characterization of the sulphided state of P–Mo/Al_2O_3 systems 353
Hydrogenation
Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Hydrogenation
Reaction selectivity as a test for catalysis on exposed metal 235
Hydrogenation
Thiophene hydrodesulphurization activity of alumina-, silica- and carbon-supported sulphided Re_2O_7 catalysts 241
Hydrogenation
Hydrogenation of carbon dioxide over copper–zirconia catalysts prepared by in-situ activation of amorphous copper–zirconium alloy 279
Hydrogenation
Effect of phosphorus on molybdenum-based hydrotreating catalysts. I. Characterization of the oxidic state of P–Mo/Al_2O_3 systems 341
Hydrotreating catalysts

Novel hydrotreating catalysts prepared from heteropolyanion complexes impregnated on alumina 187
Hydrotreating catalysts
Effect of phosphorus on molybdenum-based hydrotreating catalysts. I. Characterization of the oxidic state of P-Mo/Al_2O_3 systems 341
Hydrotreating catalysts
Effect of phosphorus on molybdenum-based hydrotreating catalysts. II. Hydrodesulphurization activity and characterization of the sulphided state of P-Mo/Al_2O_3 systems 353

In-situ activation
Hydrogenation of carbon dioxide over copper-zirconia catalysts prepared by in-situ activation of amorphous copper-zirconium alloy 279
Ion-exchange resins
Catalytic activity of sulphonated styrene-divinylbenzene resins 307
Iron
Effects of pretreatment on the surface properties of iron Fischer-Tropsch catalysts 199
Iron/silica
Preparation and properties of small silica-supported iron catalyst particles. Influence of reduction procedure 327
Isophorone aromatization
Aromatization of isophorone to 3,5-xylenol 223

Kinetics
Kinetic and mechanistic studies of nickel-catalysed olefin oligomerization 1
Kinetics
Comparative study of nitrous oxide and oxygen as oxidants for the conversion of ethylene to ethylene oxide over silver 37
Kinetics
Reaction selectivity as a test for catalysis on exposed metal 235
Kinetics
Hydrogenation of carbon dioxide over copper-zirconia catalysts prepared by in-situ activation of amorphous copper-zirconium alloy 279
Kinetics
Catalytic activity of sulphonated styrene-divinylbenzene resins 307
Kinetics
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365

Low-temperature plasma
Low-temperature plasma calcination of zeolite NH_4,Na-Y 373

Metal cations
Addition of metal cations to magnesium oxide catalyst for the aldol condensation of acetone 63
Methanol synthesis
Supported copper catalysts prepared from copper(II) formate. Hydrogenation of carbon dioxide containing feedstocks 365
Methyl oleate hydrogenation
Selective hydrogenation of methyl oleate to oleyl alcohol on mixed ruthenium-tin boride catalysts L1

Nickel
Kinetic and mechanistic studies of nickel-catalysed olefin oligomerization 1
Nickel-hydride intermediate
Kinetic and mechanistic studies of nickel-catalysed olefin oligomerization 1
Nickel-molybdenum/alumina
Study of low-percentage alumina-supported nickel-molybdenum catalysts by ESR spectroscopy and magnetic measurements 177
Nickel oxide-thorium oxide/alumina
Characterization and deactivation of NiO-ThO_2 catalysts 159
Nitric oxide reduction
Nitric oxide reduction performance of automotive palladium catalysts 93

Oleyl alcohol synthesis
Selective hydrogenation of methyl oleate to oleyl alcohol on mixed ruthenium-tin boride catalysts L1

Palladium/alumina
Nitric oxide reduction performance of automotive palladium catalysts 93
Palladium/zinc oxide
Effect of reduction and oxidation treat-

ments on Pd/ZnO catalysts 385
Partial oxidation
Antimony oxides: A guide to phase changes during catalyst preparation - a review 123
Phase changes
Antimony oxides: A guide to phase changes during catalyst preparation - a review 123
Phosphorus-molybdenum/alumina
Effect of phosphorus on molybdenum-based hydrotreating catalysts. I. Characterization of the oxidic state of P-Mo/Al_2O_3 systems 341
Phosphorus-molybdenum/alumina
Effect of phosphorus on molybdenum-based hydrotreating catalysts. II. Hydrodesulphurization activity and characterization of the sulphided state of P-Mo/Al_2O_3 systems 353
Phosphorus-nickel-molybdenum/alumina
Influence of phosphorus concentration on the type and structure of the compounds formed in the oxide form of phosphorus-nickel-molybdenum/alumina catalysts for hydrodesulphurization 295
Platinum
Automotive exhaust gas catalysts: Surface structure and activity 71

Rhenium sulphide
Thiophene hydrodesulphurization activity of alumina-, silica- and carbon-supported sulphided Re_2O_7 catalysts 241
Rhodium
Automotive exhaust gas catalysts: Surface structure and activity 71
Ruthenium-tin boride
Selective hydrogenation of methyl oleate to oleyl alcohol on mixed ruthenium-tin boride catalysts L1

Selectivity (2-methyl branched alkanes)
Synthesis and shape-selective properties of ZSM-22 137
Selectivity (3,5-xylenol)
Aromatization of isophorone to 3,5-xylenol 223
Selectivity (C_2-oxygenates)
Synthesis of C_2-oxygenates from syngas over cobalt catalysts promoted by ruthenium and alkaline earths 149
Selectivity (C_4-hydrocarbons)
Characterization and deactivation of NiO-ThO_2 catalysts 159
Selectivity (*cis*- and *trans*-dimethylhexane)
Reaction selectivity as a test for catalysis on exposed metal 235
Selectivity (*cis*-2-hexene)
Reaction selectivity as a test for catalysis on exposed metal 235
Selectivity (diacetone alcohol)
Addition of metal cations to magnesium oxide catalyst for the aldol condensation of acetone 63
Selectivity (ethene)
The Bioethanol-to-ethylene (B.E.T.E.) process 265
Selectivity (ethylene oxide)
Comparative study of nitrous oxide and oxygen as oxidants for the conversion of ethylene to ethylene oxide over silver 37
Selectivity (maleic anhydride)
Nature of the active sites of $(VO)_2P_2O_7$ in the selective oxidation of n-butane. Evidence from doping experiments 13
Selectivity (nitrogen)
Nitric oxide reduction performance of automotive palladium catalysts 93
Selectivity (oleyl alcohol)
Selective hydrogenation of methyl oleate to oleyl alcohol on mixed ruthenium-tin boride catalysts L1
Selectivity (styrene)
Expert systems approach to computer-aided design of catalysts 107
Shape-selective properties
Synthesis and shape-selective properties of ZSM-22 137
Silver
Comparative study of nitrous oxide and oxygen as oxidants for the conversion of ethylene to ethylene oxide over silver 37
Styrene-divinylbenzene
Catalytic activity of sulphonated styrene-divinylbenzene resins 307
Surface properties
Effects of pretreatment on the surface properties of iron Fischer-Tropsch catalysts 199
Syngas conversion
Synthesis of C_2-oxygenates from syngas over cobalt catalysts promoted by ruthenium and alkaline earths 149

Thin film catalyst
Reaction selectivity as a test for catalysis on exposed metal 235
Thiophene hydrodesulphurization
Thiophene hydrodesulphurization activity of alumina-, silica- and carbon-supported sulphided Re_2O_7 catalysts 241
Thiophene hydrodesulphurization
Effect of phosphorus on molybdenum-based hydrotreating catalysts. II. Hydrodesulphurization activity and characterization of the sulphided state of P–Mo/Al_2O_3 systems 353
Titanium–vanadium pyrophosphate
Preparation of high-surface-area titanium–vanadium binary pyrophosphate catalysts 51
Triflic acid
The Bioethanol-to-ethylene (B.E.T.E.) process 265
Trifluoromethanesulfonic acid
The Bioethanol-to-ethylene (B.E.T.E.) process 265
Vanadyl pyrophosphate
Nature of the active sites of $(VO)_2P_2O_7$ in the selective oxidation of n-butane. Evidence from doping experiments 13
Vapour-phase esterification
Catalytic activity of sulphonated styrene–divinylbenzene resins 307

Zeolites
Synthesis and shape-selective properties of ZSM-22 137
Zeolites
The Bioethanol-to-ethylene (B.E.T.E.) process 265
Zeolites
Low-temperature plasma calcination of zeolite NH_4,Na-Y 373
ZSM-22
Synthesis and shape-selective properties of ZSM-22 137
